

BOUNCE CONVEYOR

Adjustable Bounce Conveyors are a high efficiency sorting system used in a wide variety of applications. With Air assisted sorting and hydraulic deck angle adjustment the required fractions can be effectively sorted. Adjustable deck angles will allow for infeed variations to be quickly accounted for.

- > Australian designed and manufactured
- > SEW Helical Bevel Gear motors
- > Quality Japanese Bearings and housings
- > Sized specifically to your requirements
- > 3 Ply rough top rubber belt, 1.8 to 2.8m wide
- > Drive Roller OD348 and is rubber lagged
- > Tail Roller OD324 – Crowned
- > Easy Belt tensioning system
- > Steel Base frame ready to mount to support structure
- > Flame hardened sprockets
- > Outside panels blasted to AS1627.4, primed and top coated
- > Adjustable Angle of conveyor deck
- > Adjustable Impactor Spacing, location and size
- > Three driven sections of impactors for increased adjustability and product distribution
- > Drive Chain on impactor shafts
- > Optional hydraulic adjustment for conveyor deck
- > Optional fan assisted for light products
- > Fully assembled and factory tested in Hallam, Victoria before shipping.
